

SRC TRAVEL AGENCIES

Online Bus Ticket Reservation System

STEP 1 OF 6 — PAGE LIST & SITEMAP [v2 — Customer Portal Edition]

23 Total Pages · 3 User Roles · Admin + Employee + Customer Portal
Google OAuth · Booking Request Flow · Complete Sitemap

Developer: Kairo (Syed Humaam Ahmed) · Assistant: Cipher

Stack: ASP.NET Core MVC · C# · SQL Server · EF Core · Bootstrap 5 · Tailwind CSS

Feed to Google Antigravity FIRST — before all other PDFs

■ WHAT CHANGED — V2 CUSTOMER PORTAL EDITION

CHANGE	DETAIL
+ Customer Role Added	Customers access via Google OAuth — separate portal from Admin/Employee system
+ 4 Customer Pages	Customer Login, Customer Dashboard, New Booking Request, My Requests (pages C-01 to C-04)
+ 1 Employee Page	Pending Requests page added (E-19) — employee reviews/accepts/rejects customer requests
Updated Employee Role	Employee can now BOTH create direct bookings AND accept/reject customer requests
Updated Admin Dashboard	New stat card: Total Pending Requests + request metrics in Reports
New Booking Flow	Customer submits request → Employee accepts/rejects → Booking created on acceptance
New DB Models	Customer model + BookingRequest model + Notification model (see Step 4 PDF)
Google OAuth	Customer portal only. Admin/Employee still use credential-based login.

■ 01 · USER ROLES OVERVIEW

ROLE	AUTH METHOD	PORTAL	CAN DO
Admin	Credential Login (EMP-ID + Password)	Internal System	Full system control: buses, employees, routes, prices, reports, all bookings
Employee / Booking Staff	Credential Login (EMP-ID + Password)	Internal System	Direct bookings + Accept/Reject customer requests + Enquiry + Cancel + Print
Customer	Google OAuth (Sign in with Google)	Customer Portal	Submit booking requests, track status, cancel own pending requests

■ 02 · BOOKING FLOWS

There are now TWO ways a booking can be created in the system:

FLOW	INITIATED BY	STEPS	RESULT
Direct Booking	Employee	Employee fills New Booking form → Confirms → Booking created instantly	Booking confirmed immediately. Seat assigned by employee.
Request Flow	Customer	Customer submits request (route+date+bus type) → Employee reviews → Accept or Reject	On Accept: Employee assigns seat → Booking created → Both notified. On Reject: Customer notified with reason.

Booking Request Business Rules

RULE	DETAIL
One Active Request	Customer can only have ONE active request (Pending or Accepted) at a time. New request allowed only after Rejection / Expiry / Customer Cancellation.
Auto-Expiry	Request auto-expires 15 hours before the travel date+time. Status changes to Expired. Customer notified.
Seat Selection	Default: Employee assigns seat on acceptance (standard fare). Optional: Customer may select specific seat for premium charge — seat is NOT held during pending, only confirmed on acceptance.
Customer Cancellation	Customer can cancel their own PENDING request at any time. Cannot cancel after acceptance.
Payment	Counter payment only. No online payment. Customer pays at branch on travel day.
Fare Display	Customer sees estimated fare breakdown on request form (based on route + bus type + age). Final fare confirmed by employee on acceptance.
Notifications	Both in-app AND email notifications for: request received, accepted, rejected, expired, cancelled.
Request Code	Auto-generated: REQ-YYYY-XXXX format. e.g. REQ-2025-0042

■ 03 · COMPLETE PAGE LIST — 23 PAGES

AUTH (Shared Pre-Authentication)

PAGE	NAME	URL	ROLE	LAYOUT
01	Admin/Employee Login	/Auth/Login	Admin + Employee	Split Screen 40/60 — no sidebar
C-01	Customer Login / Google OAuth	/Customer/Login	Customer	Centered card — no sidebar — Google Sign-In btn

ADMIN PAGES (Admin role only)

PAGE	NAME	URL	LAYOUT	KEY CHANGE
02	Admin Dashboard	/Admin/Dashboard	Standard 70/30	+ Pending Requests stat card
03	Manage Buses	/Admin/Buses	Standard + slide panel	No change
04	Manage Employees	/Admin/Employees	Standard + slide panel	No change
05	Manage Price List	/Admin/PriceList	Standard + right rules panel	No change
06	Manage Routes	/Admin/Routes	Standard + slide panel	No change
07	Booking History	/Shared/BookingHistory	Standard full-width	Admin sees ALL incl. request-originated bookings
08	Reports	/Admin/Reports	Standard + charts	+ Request acceptance rate metric
09	Admin Profile	/Admin/Profile	Standard + 3 tabs	No change

EMPLOYEE PAGES (BookingStaff role)

PAGE	NAME	URL	LAYOUT	KEY CHANGE
10	Employee Dashboard	/Employee/Dashboard	Standard 70/30	+ Pending Requests pulsing count card
11	New Booking	/Employee/NewBooking	60/40 form+summary	No change (direct booking)
12	Enquiry Form	/Employee/Enquiry	Standard + live right panel	No change
13	Search Records	/Shared/SearchRecords	Standard + 3-tab results	+ Customer requests tab
14	Cancel Ticket	/Employee/CancelTicket	Standard + refund calc	No change
15	Print Ticket	/Employee/PrintTicket/{id}	WHITE bg — no sidebar	No change

■ 05 · BOOKING REQUEST STATUS FLOW

A BookingRequest moves through the following statuses during its lifecycle:

STATUS	COLOR	MEANING	NEXT STATUS	WHO TRIGGERS
Pending	#E8C547 Yellow	Submitted — waiting for employee review	Accepted / Rejected / Expired / CancelledByCustomer	System (on submit)
Accepted	#52B788 Green	Employee accepted — Booking record created	Terminal state	Employee
Rejected	#D64045 Red	Employee rejected with reason	Terminal state — customer can submit new	Employee
Expired	#9A8678 Grey	Auto-expired 15hrs before travel — no action taken	Terminal state — customer can submit new	System (background job)
CancelledByCustomer	#9A8678 Grey	Customer cancelled own pending request	Terminal state — customer can submit new	Customer

Request Status: Can Customer Submit New Request?

CURRENT STATUS	CAN SUBMIT NEW REQUEST?	REASON
Pending	■ NO	Must wait for employee decision or cancel current request
Accepted	■ NO	Booking already confirmed — cannot double-book
Rejected	■ YES	Request was declined — customer free to try again
Expired	■ YES	Request timed out — customer can submit fresh request
CancelledByCustomer	■ YES	Customer chose to cancel — free to make new request
None (no history)	■ YES	First-time request — always allowed
